

Updating My1Login's Entra Directory Synchroniser

Before you start the .msi program to update My1Login's Entra Directory Synchroniser, stop the My1Login service that is running.

- Open the My1Login Entra Directory Sync Manager
- Go to the "Service Control" tab
- Click the "Stop" button next to "Service State"
 - Note: From here, Entra users will be temporarily unable to log in.
- Close the My1login Entra Directory Sync Manager

Open the .msi file that you downloaded on the Entra Directory server and follow the instructions.

Once the installation is complete the new Entra Directory Sync Manager will appear. Click on the Start Button to turn back on the My1Login EDS Service. Once the service is started, Entra users will be able to log in again.
